

Alex Jones Interview with Dr. Judy Mikovits 5/28/2022

Dr. Mikovits: Every single talk I give has always been based on published data. I show you the facts and how the words are twisted and how the words are used differently to lie to the public. This is my testimony. This bioweapon has killed 61,000 millennials. I have a PhD in biochemistry and molecular biology. I defended my thesis, which was HIV latency, that is silencing in monocytes, in a type of cell in the innate immune system. And basically, if your cell biology, your innate immunity is kept strong, what the thesis said was HIV will never cause AIDS. I defended that thesis one week after Magic Johnson declared that he tested seropositive. That means he had an antibody. We didn't have PCR, well we had PCR. But Kary Mullis was still alive and knew. You don't test for infectious viruses, particularly retroviruses, as 8% of our genome is retroviral. This was the basis of all my work and PhD thesis saying HIV doesn't have to cause disease if you keep your innate immune system healthy. And my work progressed through the nineties where I was literally developing clones of cell lines in order to support growth of other viruses like Ebola and other strains of viruses, to understand the molecular pathways of how they cause disease with the idea that you would attenuate those pathways and make them weaker.

Dr. Mikovits: But what actually Tony Fauci and the pharmacy that owns our country, the FDA, the CDC, what they were actually doing was experimenting on the most vulnerable in our society, using these cell lines. I cultured Ebola Zaire strain. I looked at Ebola Zaire strain versus Ebola Reston strain and showed in the mid nineties, actually published and put a publication together in in all of this, and here the Ebola Reston strain from the bats is grown efficiently in the Vero E6 clone. It's a sub clone, you clone by limiting dilution - how to make these cells these viruses not kill the cells so that you can grow them and theoretically develop them by understanding the mechanisms, natural product therapies or treatments. And what that work showed throughout the three decades was, in fact, what Tony Fauci was doing was weaponizing these.

Dr. Mikovits: I was arrested in 2011 when the discovery that I published in the journal Science in 2009 was shown to be a family of mouse related viruses known as XMRVs. So murine leukemia, virus related retrovirus, they literally cause cancer and they literally were spread through the labs, nosocomial, through the lab workers.

Dr. Mikovits: These were mouse viruses, monkey viruses that were being used in these cell lines to recombine. And this is all the work of Baric. So I was arrested in 2011 for refusing to lie about the data, publish it a different way, interpret it a different way, and, you know, basically just defraud the public and keep the game going. I was arrested without a warrant. This is all the topic of the movie Plandemic. You can find it at plandemicseries.com and that was that original movie which came out May 4th of 2020, It was supposed to be a promotional video of the book Plague of Corruption. And I started writing with Kent Heckenlively in 2014 when I realized our first book, which described every story about the XMRVs The Retroviruses, How Ian Lipkin. John Coffin The Medical Mafia, Bob Silverman, Joe Derisi - literally given awards. Bob Silverman was particularly crippling the part of our immune system that is an enzyme that degrades RNA, DNA hybrids. So messenger RNA that will be reversed transcribed back into DNA, which is what a retrovirus is. It writes backwards, mRNA into DNA and then inserts it into the DNA of your genome causing cancers.

Alex: All right. Judy Mikovits is an author, filmmaker and scientist and she's right at the center of Fauci and predicted over two years ago what would unfold. Now it's here, the mass death, the heart attacks, the illnesses, the exploding cancer.

Dr. Mikovits: So basically what happened for 40 years is Tony Fauci and the pharmaceutical industry were experimenting by way of untested, manufactured, synthetic recombinant vaccines. Everything we know about what was in plague of corruption. And then the Plandemic event, 201, which was held in late 2019 when the book was supposed to be published. Now, here we have we had solutions for the autism, myalgic encephalomyelitis, psychosis, PTSD, all the cancers caused by the murine leukemia, the eczema, ARVs, and that can be monkey mouse manufactured. So

what is Suramin? So Suramin is a 100 year old drug that is in the same family of drugs as ivermectin. Yes. And so I show the slide and that review was published at the end of 2020. But what nobody knows about is that drug was used by us. I'm a drug developer, a natural products developer at the National Cancer Institute from 1980 until 2001 when I moved to industry at Epigenetics Pharmaceuticals. So what our research showed over 20 years was it was the expression of the genes, not the presence of a gene, and particularly in the retrovirus, keep it silent, don't let it wake up and it won't recombine and it won't be infectious. But you cannot inject any of the manufactured viruses. So every single vaccine on the schedule is a new biological, a new therapy. They've never been tested. They're manufactured, they're recombinant. And here in the key to everything is the envelope. The spike protein in SARS-CoV-2 was a monkey virus. Sars-cov-2 is a monkey virus.

Dr. Mikovits: So here they've been experimenting for 40 years and they publish 100 years of medicinal chemistry. It's a synthetic drug. Well, I talked about it on purpose last year because I knew of the double blind placebo controlled study. So this the target of this pure nerve agent modulator, Purines and Pyrimidine make up the base pairs of your DNA. The purines are a and g ivermectin in serum and are purinergic modulators. They're absolutely vital hundred year old and 40 year old essential medicines, as we know. And here you see in this review, here are all the diseases and pathogens susceptible to suramin. And so you've got hepatitis, HIV, AIDS, Enterovirus 71 is the new polio, if you will, that the polio vaccine is causing. So Ebola, Zika, dengue look at all the cancers, look at snake bite, arthritis. So here you have COVID. Oh, here you have COVID. All the people who they've denied ivermectin in Suramin fabulous anti cancer. They knew they were causing these diseases and I go to slide 41 on that slide show 41 slides into it and I'm showing you data which prove absolutely everything I'm saying. Here is a 2011 paper, October 2011. It was submitted to the Journal of Virology and it was published in January 2012. Why is that significant? Because I was locked out of my lab, fired, all my data taken away from me, engineered by Tony Fauci, who paid off my employers, the Wittemores, who are actually convicted felons for having Harry Reid illegally elected.

Dr. Mikovits: All of these stories are in our books. They're not stories. They're fact. Nobody's ever challenged one word of our book, which is why Plandemic is censored. So that paper from 2011 that I just showed you, look at all of those sequences in paper 41. It was submitted a month after I was fired. And all the data out of my lab and all the samples. All the cell lines, all the evidence they thought they had locked down. But the last chapter of our book said we weren't criminal. William Thompson. We saved all the samples. Look at all the viruses. Look at all the strains. Look at all the retroviruses. Moloney Murine leukemia virus. There's also one called Masan Pfizer Monkey Virus. Oh, that would be that pox virus. So if you look at all of these and this is what they published in journal Virology thinking nobody could say in bat feces in a cave in China as if they came there. But so then retroviruses. How did a cat brine arthritis encephalitis virus that's a goat or a sheep virus. And a moloney murine is another mouse virus and then it says other retroviruses. So if you go to the next slide.

Alex: Explain these people. They are putting zoological viruses in the vaccines.

Dr. Mikovits: And they're there in the cell lines and they've been there all along. If you look at the next slide, what you're going to see is the other retroviruses in the supplemental material that nobody ever reads in the papers. So you don't know. So they're showing you how did you get VP62, which is a lab infectious gain of function molecular clone made by Bob Silverman's lab. Oh, the one who made it evade the immune system of blacks, Native Americans. They know exactly what they're doing. Look at all of the viruses.

Alex: So you're saying this is a race specific attack?

Dr. Mikovits: Well, it's race and gender. And that's why the first slide said favored species. What Darwin is doing this is they are our God. This is Patrick Wood's testimony in our and presentations in the Crimes Against Humanity tour that they're God. So they know exactly as they've targeted the athletes like Magic Johnson. HIV is to AZT is to

AIDS. Yeah. Here it is. The original paper Origins of Species by Natural Selection is what most people see, and nobody sees that second page "or the preservation of favored races in the struggle of life." So they think they can change the code of our DNA, the one world order, and this is the game to inject us with that cell line. Every one of the viruses on 41 are in Vero E6 are in the Vero Monkey kidney cell lines we've been injecting is polio vaccines for 30 years. And they've acknowledged this.

Alex: And I hope listeners are listening very, very closely to Judy Mikovits, who is a top scientists who worked directly with Fauci on record who exposed the plan to implant cancer viruses in us. But it's not just her opinion and she didn't just witness it. It's in the Rockefeller Foundation documents. It's in the movie JFK. They were trying to create cancer viruses and inject us because that was going on. And even Jim Garrison, the district attorney of New Orleans, found all that. So this is their big move. What does the spike protein do? What do we now expect to see? She predicted it two years ago. The mass death, record cancer, all of it. What's coming next? How is their plan going and how do we counter? Because you've been giving us all the high level analysis anyone can go look it up. But big picture, just as a citizen, as a human Of where this is, doctor.

Dr. Mikovits: Yeah. The big picture of where this is because that's what I was showing in the slides. They've been in these cell lines. Every single vaccine manufactured today, not a single safety study is done double blind, placebo controlled study. So what's happening right now? All those viruses are in all those vaccines are in all those products. You have the aborted fetal cell lines and you can see the dangers of using GMOs as your last talk just showed. My first degree that I got in 1980 as a natural products chemist. I make drugs out of plants and this is what the government is stopping you from having; minerals, vitamins, amino acids. All people have to do right now is realize every single shot has had these sequences in them the infectious molecular clones, the gain of function, synthetic manufactured viruses in every polio.....

Alex: It may be a tetanus shot, it may be a hepatitis shot. It may actually do that. But it's got all this as a payload as well.

Dr. Mikovits: Correct? There is no tetanus shot because it's DTaP and all of these things are manufactured. And we've shown this in vaccine court. We showed the injured, we showed the contaminants, the red blood cells. Slide number 44 shows you a 2017 paper done by the Italians. These are published studies showing you all the garbage in the shots. It's not just the covid bioweapon, the shot that was weaponized because the monkey virus they created in 2004. I show you the publication of the tripartite part HIV part XMRV, that envelope that is called Syncitin that is the component of snake venom. Every animal, every human has since syncitin. So if you put another human in the aborted fetal cell line, a male and a female that are in every vaccine and we give every vaccine all at once, 6 things all....

Alex: Slow down to explain an immortal cell line to people. They don't know what that means.

Dr. Mikovits: It means they live forever. They grow in the lab. I take a liquid like this, a vial, and I grow it up in a fermenter. And I do fermentation chemistry. I add cow blood, I add media, I add horse blood, I add pig blood, I add bovine serum albumin, I add antimycotics, I add antibiotics, and I grow it in a fermenter. And then I isolate the whole thing, meaning, purify it, filter away all the other animal proteins, and then make only the vaccine using the one virus. But that's never been done. That's what everybody thinks is in a vaccine. No, every virus I showed you on that 2011 paper, along with synthetic viruses out of our laboratory, have been in those cell lines since 1992. I made those clones. I did that work. They injected that Ebola. In 2014, Tony Fauci sent it to Liberia under the direction of Obama in a vaccine program, killed 21,000 innocent people in Liberia and literally to cover up William Thompson's confession of the CDC fraud that he confessed.

Alex: So, Dr. Mikovits, you are a leading expert. You're so respected. What is their endgame? Why are they doing this? How they're getting away with and planning everybody with cancer causing programs.

Dr. Mikovits: The endgame is to kill everybody they experimented on in that table, Zika, Ebola. They figured out everything they needed to do to hurt the Brazilians, to hurt the blacks, to hurt the, you know, all the various endemic viruses. How to cause disease along with weapon.

Alex: So black folks are smart worldwide, not wanting to take the shot.

Dr. Mikovits: Absolutely. And we advised the honorable Robert F Kennedy jr., advised the Honorable Minister Louis Farrakhan on December 18, 2001. He said, please don't give this to black people. And he he saw every slide that was in this projector. I haven't used a new slide until their new publications in 2020 as they try to con you. What we have to do is never get another shot. Do not take their poison. They Bayer-Monsanto and ask yourself, is that monkeypox? This is a vaccine injury of a boy of Vietnamese, because it's not just blacks, it's Hispanics, it's Native Americans. They know exactly what disease they're trying to cause. And now COVID was murder them all with the shot. Premeditated murder is what I'm charging them with. And I prove it through these four books, the literature....

Alex: I know that Dick Cheney in April of 2000 wrote Rebuilding America's Defenses and Call for Specific Bio Weapons. But I know plenty of white people that have died after the shot and of COVID. But but I have talked to a lot of other scientists they do say this is race specific. So what's really going on?

Dr. Mikovits: Well, I mean, it's both because our immune systems I'm a lab worker, it's also misogynist. It's against women because what they can't do, the globalist, is hack our genome. We are not our DNA, we're our chromosomes. And so if they keep injecting us as they've bypassed our innate immune response, that's what Gert Van Den Bosch is talking about.

Alex: Explain that we are already pre-programmed with a constitution, who we are. They can only try to manipulate the feed to that. They don't control what God made us.

Dr. Mikovits: And we are not our DNA, our codon. 97% of our RNA is never translated into proteins. It's message, it's regulatory, it tells, it sends the fire trucks to the fire, as I like to say, your immune cells.

Alex: So, why are they targeting brown people?

Dr. Mikovits: Because they've been experimenting on on them for for decades, like HIV AIDS. So athletes like Magic Johnson, that's why I showed that. My PhD thesis committee said based on your thesis will he or will he not die of AIDS. And I said, he'll never get it, but he's got to change everything we were doing. And this is where Mickey Willis said in that movie, My brother died of AZT. And I said, Don't you mean AIDS? And this is 2019. And I didn't know because I made these drugs and he was seropositive; antibody dependent enhancement. So everybody who is infected and immune by their God given immunity will die from the shots. So all of the kids that have been mandated and injured by the vaccines, not just blacks, but they've targeted diabetes, all of the susceptible, the fat, the glyphosate poisoning, the lack of cannabis in our environment, one of the most potent detoxifying plants for for heavy metals in our soil.

Alex: Dr. Mikovits, big picture, you've given us science, you've given us backgrounds. People can search anything you say and find it. But big picture, how is their attack going? How is their next push for new lockdowns forced inoculations with these cancer injections? How is the program going for the New World Order?

Dr. Mikovits: Right. So it's not so they got caught. They know it. What most people now realize is don't get another shot. I mean, no shot. I just showed you. They were all bioweapons.

Alex: Moderna and Pfizer admit nobody will take it and nobody ever took it in a bunch of countries. Nobody's taking it. They're going to throw it away.

Dr. Mikovits: No, but. But also never another vaccine, not a polio shot, not an MMR. That's why I showed you all those viruses. They've been in those cell lines continuously growing in our lab for 50 years. We've got them in freezers. We grow them up. I can prove Omicron was in humans, including me and my husband, in 2010. We sero converted and created antibodies. So the real important endgame is they've got to get everybody injected because then the rest of your environment, your food and your particulates is poison. And so this is why I talk about Suramin.

Alex: Talk about it. What you're saying is they've merged immortal cell line viruses with spike protein as the infectious delivery system.

Dr. Mikovits: Correct. They're creating the spike proteins in the cell lines. They don't have to merge. They've been we've been doing this since the sixties. These cell lines have been growing in our lab since the sixties. So we've been experimenting various viruses and seeing if you could add them and combine them and see what you can do with them....

Alex: What they do, what they do to humans in lab rats. What do you expect to happen with the public? Because mainline insurance companies are seeing a 40% increase in death.

Dr. Mikovits: That's exactly what we expect in the heavily vaccinated. But the way to solve the problem is never again get another shot or take their contaminated products of Bayer-Monsanto. No more GMO, not food. Every shot is a genetically modified organism. Every shot is gain of function. Every shot is synthetic. They've always been that way. They've lied to us and look how healthy we are if we eat clean food. When you walk away from them and in that little boy with the monkey pox. All we did was give him clean food in products like the Zelenko Z-stack. This was a slide I made in 2019. I'm

standing there trying to stop them from inoculating the vaccine injured. That's children who already have seizures. And I'm on a street corner in Oxnard where they're forcing it on these children with the criminal bills of Newsom and Senator Pan, we knew they were trying to kill our kids. But the last in all of these corrupt people, if that had happened, we would never had COVID. Every single piece of data I'm showing you we had in 2014 and presented to the FBI and presented to the Ninth Circuit Court, the attorney general, and they did nothing except pay off the criminals. And that's what Tony Fauci....

Alex: But I totally agree. Talk about Fauci, but you predicted it. It happened. It's on record. The research is there. But you said there caught, I agree. The world is waking up to them. What do you expect them to pull next? Another bio weapon release they've cooked up in a lab?

Dr. Mikovits: The only way they can do that is, is by injecting it. It's already in the lab. I don't care what they do next because it's in our control. They've poisoned our food. They poison our animals. They admitted aspirin, Benadryl, Maalox. They're all loaded with aborted fetal cell line with sensitive syncytin with the central peptide component of snake venom that humans have a natural God given immune response to. It's called human endogenous retrovirus W. It's the proof that God's immunity is all you need. They can't hack our chromosomes unless they inject it or we keep ingesting the poison. They're poisoning our food as you're saying. All we have to do is turn away every human being. I'm infected with all of these things. I have Ebola, I have everything. I have antibodies to them. I'm immune. You never inject an AIDS patient with anything because you'll spread AIDS through his body and through his family's bodies. And that's what the papers and that's what everything says here. They knew they got the health care workers sick. Nobody wears a mask, it destroys your own immune system. There's nothing about any of this that is safe, comfortable or anybody....

Alex: Explain that wearing a mask makes your body turn off its immune system.

Dr. Mikovits: Because you're hypoxic. Hypoxia inducible factor one alpha is an on off switch a blowtorch on cancer since syncytin is a fusogenic peptide that fuses together cancer cells. The XMRVs have a mouse syncytin. Your own body says, That's not me. That's mouse. Autoimmune diseases. We can't tell the difference between self and non-self. You never inject anything in the first day of life because it disregulates the expression of your genes.

Alex: Right. Why don't babies get sick for six months? Yeah, but you inject them It just destabilizes that.

Dr. Mikovits: And you never inject in pregnancy. And everything here shows you how they've been trying to experiment by injecting pregnant women. And so they finish their experiments. They know from this shot that they got it. So now it's kill everybody. Call it COVID, cremate them. So you don't have the sequences. And we can show you in these books. We have freezers full of the cell lines that we handed the FBI in 2014, and they did nothing except cover it up. President Obama led the way to murder these people. That's what the crimes against humanity are. Fauci knows exactly what they're doing. Every one of these shots is poison. But if we all turn away and turn back to God, we don't believe in their God. Our cult is not scientism. We believe in our God. Yes, we believe in the purity of the body. And no, you're not ever touching me again. And then they don't pull anything. Stop. People, just walk away and say no more. This is our country, one nation under God. And we don't bow down to Fauci or any other one world order. They cannot hack our genome unless you let them. That's my rant. Stop injecting, walk away, eat clean food, buy clean food. Don't eat their glyphosate in their GMO and their poison and they go down. Done. No more. We're out of your game. We're out of your economy. One Nation under God. And the Honorable Minister Farrakhan told his people and they didn't do it. How many people are saved if we all stand up.

Alex: Like Africa has the lowest COVID rate like 1% because they're not dumb. They didn't take it.

Dr. Mikovits: And they take ivermectin and suramin all the time prophylactically. They're not horse pills. If your doctors don't know that purines make up the base pairs of our DNA, that there are hundreds of proteins that control sense of taste and smell. AZT AIDS. The AZT killed the guys, the XMRVs in the women, the recombinant...

Alex: You are on fire and you're totally right. And you're angry and you should be. How do people find your fine work?

Dr. Mikovits: The real Dr. Judy. Our Web sites are the real Dr. Judy. You can get all of our books at Plague The BBC.com and the Great Awakening. Bbc.com. They're all there. Not one word has ever been disproven. Every references is there. They're not my opinion. They. You know, they're.

Alex: I'm not a scientist like you. But this is all mainline. What you're saying is all public. Join us in the studio. We'll fly you here. Join us again on a routine basis. Everybody can find your great site. Dr. Judy Mikovits, thank you so much.
