

## GB-Tone

**GB-Tone** is a homeopathic combination formula for gallbladder symptoms. As a part of the biliary tree, the gallbladder plays an important role in digestion, particularly the digestion of fats. Though some consider the gallbladder to be a non-vital organ, when it is congested or after a cholecystectomy, its essential function will have to be absorbed by other organs, in turn putting strain on their primary functions.

*For symptoms of abdominal pain, pain in the right shoulder, belching, sour taste in mouth, intense headaches, nausea, constipation, and clay-colored stools.*
